

GoMicro Inspect

Para inspeccionar insectos, enfermedades de las plantas,
o calidad de producto

- ♦ Un diseño multi-lente para una imagen clara y precisa
- ♦ Resistente al agua y a los golpes.
- ♦ Muy fácil de usar
- ♦ Sin batería
- ♦ Compatible con teléfonos móviles o tabletas

Diseñado para ser robusto y fácil de usar

Inspeccione insectos, enfermedades y calidad del producto

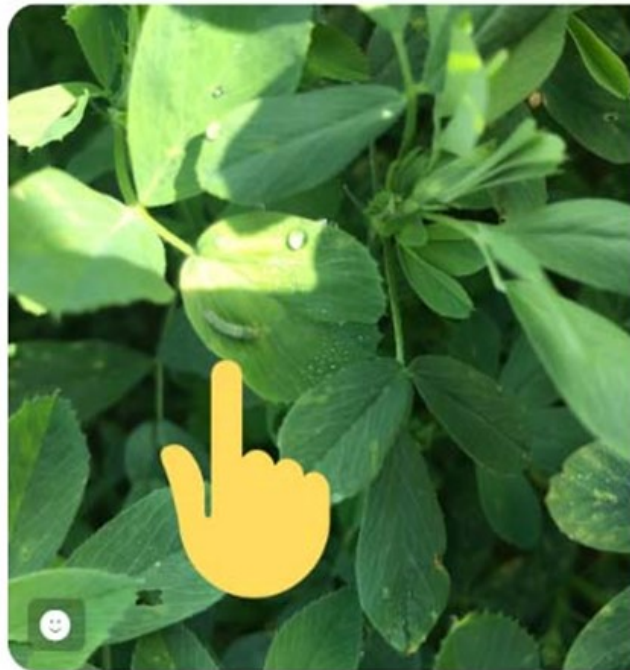

Brendan Magee @BrendoMagee · Jan 21

I don't know how good your eyes are 👁️ but I was sick of not being able to identify small insects in the paddock

But now that's all changed thanks to [@gomicroau](#)

Gomicro is a small microscope that just clips on to your phone or tablet

Great for identifying plant diseases too

Anticípese con un diagnóstico rápido

“ GoMicro es un nuevo gran instrumento
para agricultores y agrónomos “

Bit of disease in the #vineyard looking to make its presence felt. Great detail once again thanks to @gomicrou #viticulture #limestonecoast #agronomy #grape

Matt Witney @DMag_consultant · Sep 12

Great to see the new intercept registration giving vetch some very handy suppression in Hurricane lentils - added bonus is the stressed vetch does not have imadoclopid and aphids are finishing it off!

Craig Gameau @cgameau · Aug 12

Thanks @PestFactsSARDI @gomicrou

AgXtra @AgXtra · Jul 26

@abruceleh visited a canola blackleg disease site and there were plenty early symptoms! The drizzly weather is ideal for disease proliferation. The characteristic pycnidia are clearly visible and the use of the @gomicrou microscope is great for closeup shots! #canola #blackleg

Sean Matthewson @SeanM_DMAG_SA · Jul 25

Ascochyta in Morava Vetch in NW VIC Mallee. Good rains during June and July growing good biomass but aiding disease spread. Handy tool with @gomicrou to help ID disease.

Sara Blake @Sara_N_Blake · Jul 22

#spottedthisweek #AscochytaBlight in Fiesta faba beans from the South East
@AusCropDiseases @SARDIScience @GRDCSouth @SA_PIRSA @gomicrou @waiterresearch Will collect isolates for seasonal disease monitoring

Testing out my new GoMicro (@gomicrou) at home today, thanks @BrendoMagee for getting me this little beauty. Found a mealybug on one of Gardenia plants. Can't wait to test it out in the field.

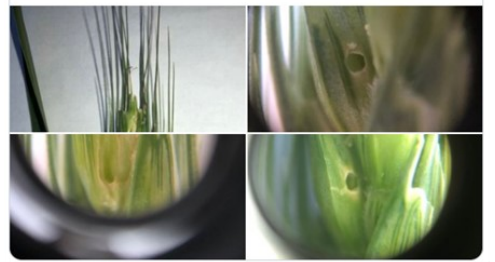

Brendan Magee @BrendoMagee · Dec 14, 2018

This pivot of @pioneerseedsau 1467 Corn was a hive of activity today! All out in tassels and the pollen was thick on the plants should be no problem with pollination here
And a close up of the silks thanks to @gomicrou where you can see pollen attaching
#EldersAgvice #corn2018

Chris Davey @CropDoctor54 · Aug 28, 2018

#askTwitter Has anyone seen anything like this before chewing holes in the forming grain in green Wheat heads? I couldn't find any culprit present in the crop/canopy/soil. 🤔
